

## EDGES FIXER **EFE-3**

EFE-3 edges fixer has been designed to lay down cast film borders in production lines, thus preventing film from reducing its length.

The adjustable and interchangeable stainless steel emitters are connected to high voltage by means of resistors and impede sparks creation, while being safer for the operator.

EFE-3 edges fixers are powered by ECG-30 charge generator

EFE-3	
Body material	PTFE
Emitters material	Stainless steel, replaceable
Emitters	diam. 3mm, available in various lengths
Power supply	ECG-30
Working temperature	0° C - 150° C
Option:	Mounting bracket

ANTISTATIC CONTROL SYSTEMS
